# Join Our Team as a Welder / Fabricator

Niagara Industrial Mechanical | Niagara Falls, NY

## WE'RE NOT JUST WELDING PARTS—WE'RE BUILDING TRUST, UPTIME, AND LEGACY.

At Niagara Industrial Mechanical, we're the missing link between unpredictable downtime and full-scale production. Our clients count on us to deliver precision, durability, and technical partnership that keeps operations moving in essential industries like energy, food production, and pharmaceuticals.

**We're looking for detail-driven welders and fabricators who care about quality, team cohesion, and getting the job done right—every time.**

### WHY YOU'LL WANT TO WORK HERE

#### Pride in Craftsmanship

You'll work with skilled tradespeople who value precision, safety, and doing things right the first time.

#### Local Impact, Long-Term Legacy

We're growing fast—but we're rooted here. The work we do keeps our region's essential services running and provides lasting value for generations.

#### Innovation at Your Fingertips

From advanced beam processors to precision automation, you'll have access to the tools and tech that make your work easier—and more rewarding.

#### Respect for Your Skills and Growth

We offer competitive pay, room for advancement, and a team that recognizes what you bring to the table.

#### Integrity-Driven Environment

We follow through on our word, show up with pride, and treat every job like it's our own reputation on the line.

### THE ROLE

- Full-time position with flexible scheduling options
- Hands-on fabrication and welding in our growing shop and on-site as needed
- Contribute to production planning, continuous improvement, and equipment maintenance

### WHAT WE'RE LOOKING FOR

- Proficiency in MIG and TIG welding, with experience in carbon and stainless steel
- Experience with layout, blueprint reading, and metal forming equipment
- Excellent problem-solving skills and commitment to quality
- Strong safety awareness and accountability
- Positive attitude and a willingness to train, mentor, or learn new skills

### BONUS IF YOU HAVE:

- Red Seal or AWS certification
- Experience with automated cutting and fabrication tools
- Background in high-pressure or mission-critical environments
